WELDING & GRINDING

// VERTEX BOOTH VB

// MODULAR SYSTEM

Based on the VertEx modular system, the addition of flexible booth panels allow for the construction of large walk-in booths, quickly and efficiently.

// VERTEX OPTIONS

Choose the most appropriate base unit from the VertEx VA and VR Ranges; including selecting a suitable filter for your process.

Then use the VB modular booth system to enclose and contain the process.

// BUILD A BOOTH

From a simple extracted wall to a full height extracted booth, constructed within a day using the VertEx modular approach.

// CONTROLS

We offer a range of options starting from separately controlled single phase units through to central or remotely controlled 3ph systems.

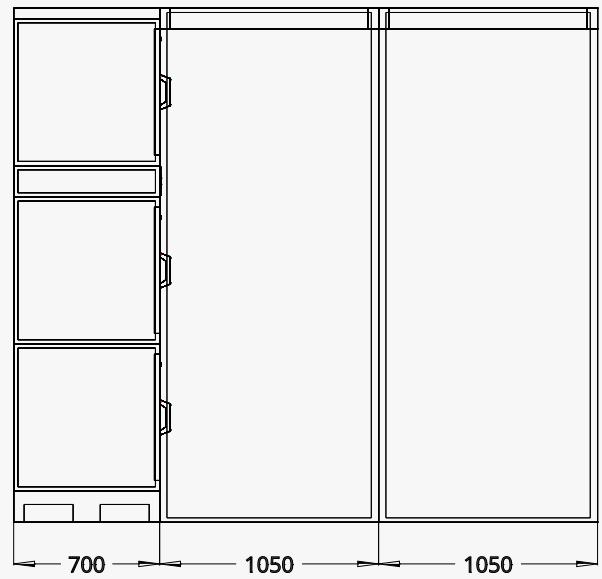

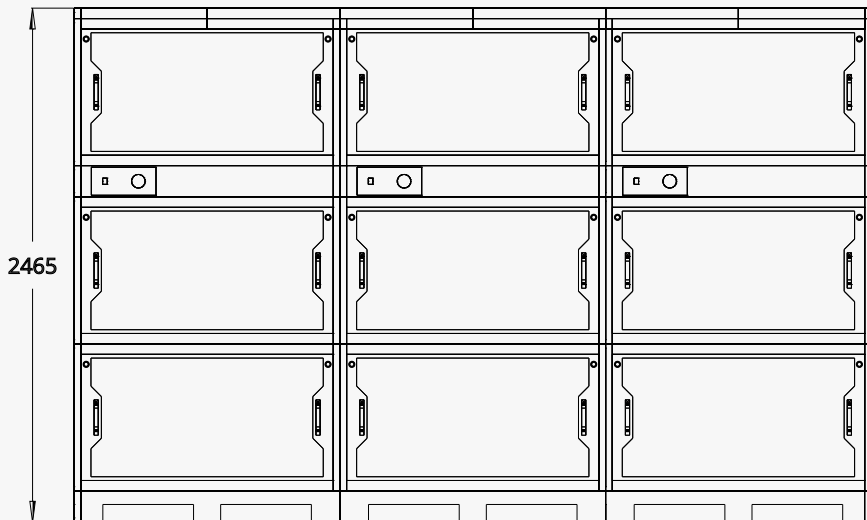

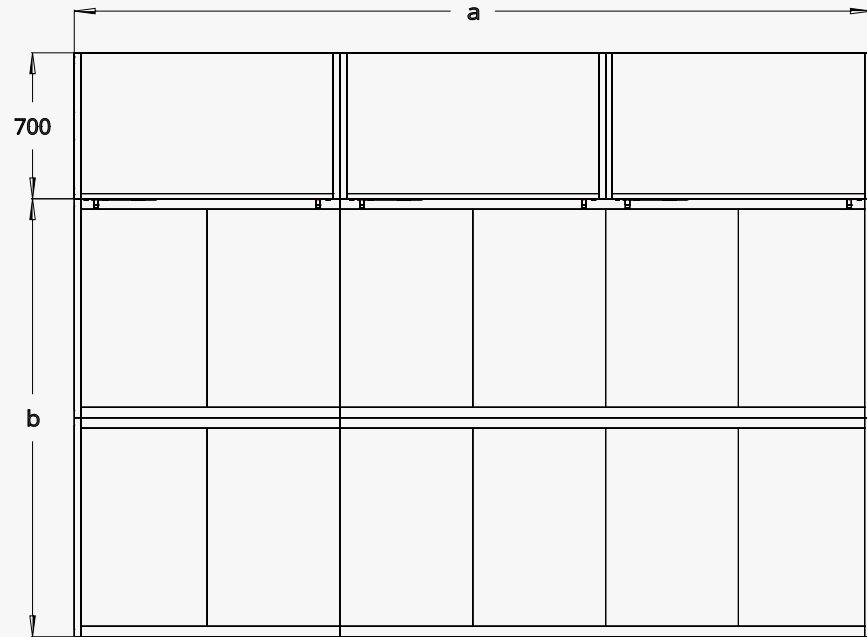

// HIGH EFFICIENCY FANS

Using our VertEx VA or VP base units, the standard low-energy fans provide class-leading booth airflow at low power levels.
